

PAYMENT SOLUTIONS MADE EASY

SECURE BROADBAND EFTPOS - PROCESSING PAYMENTS SECURELY

A Smartpay Cadmus Secure Broadband EFTPOS solution will allow you to make seamless EFTPOS transactions over the internet, regardless of the size of your business. You'll not only save money, you and your customers will have confidence knowing that the transaction is secure, reliable and fast.

Whether you require one or more standalone EFTPOS terminals, or an integrated EFTPOS product, Smartpay Cadmus can provide you with Secure Broadband EFTPOS to suit your business needs.

THE BENEFITS OF EFTPOS TO YOUR BUSINESS

SAVE YOURSELF SOME MONEY

Using Smartpay Cadmus' Secure Broadband EFTPOS means you'll save money normally spent on your stores phone line rental. You'll be able to connect over one broadband line which you can use for phone calls, day to day internet activity and secure EFTPOS transactions on all the terminals in your store.

SPEED UP YOUR EFTPOS TRANSACTIONS

With broadband, your EFTPOS transactions will be processed significantly faster than with a dial-up connection. This will improve customer experience and staff productivity, especially during busy peaks.

YOUR BUSINESS WON'T STOP

With different back-up options (Dial-up / GPRS and Electronic offline vouchers), you can ensure that you'll always be able to provide your customers with EFTPOS even if your broadband connection is down. Additionally, you won't have to drop a phone call from a customer to process an EFTPOS transaction - Secure Broadband EFTPOS allows you to do both at the same time.

PROCESS YOUR PAYMENTS SECURELY

Smartpay Cadmus Secure Broadband EFTPOS solutions are fully encrypted and meet latest international security standards. Your EFTPOS transactions will always be safe and secure.

DEAL WITH A TRUSTED PROVIDER
