

PAYMENT SOLUTIONS MADE EASY

STANDALONE EFTPOS - ADVANCED COUNTER TOP TOUCH SCREEN

If your business requires more than just EFTPOS facilities the AC8000M, with its easy to read graphical touchscreen, offers additional applications such as Mobile Phone top-up, Bill Payment and CurrencySelect EFTPOS. Options may be displayed as graphics, company logos or icons as part of the menu selection process making the AC8000M intuitive and easy to use.

MARKETS

This product is suitable for multi-payment, high traffic retail businesses whereby the merchant can process different customer payment options quickly and accurately. The AC8000M suits businesses such as mobile phone shops, stationery and book shops, post offices and convenience stores.

THE BENEFITS OF EFTPOS TO YOUR BUSINESS

- Reduces risk associated with handling excessive cash

MORE THAN JUST EFTPOS FEATURES AND BENEFITS*

SECURITY COMPLIANT

All Cadmus terminals are developed to the latest international banking security standards, which enhance payment security and are Chip Card compliant.

ERGONOMIC DESIGN

The large screen and keys have been ergonomically designed for easy PIN entry. Back lighting ensures the screen and keys are easy to read, especially in darker environments where EFTPOS is used.

PRE-AUTHORISATION

Important for businesses that operate a deposit or bond system as a part of their service offering. Pre-authorisation capability allows you to check validity, funds availability and enables you to place a hold on funds.

TIPPING

Important for businesses where customers want to acknowledge good service. The Tipping feature is easy to activate and operate.

MULTI-MERCHANT CAPABLE

This enables multiple business entities to share a single EFTPOS terminal.

MANUAL PAN

Ideal for telephone or mail order businesses.

DECLINE ALERT

Stops declined transactions and requires merchant intervention.

MULTI-DROPPING

Multiple terminals can be installed in an environment where only a single phone line is available. This solution ensures that transaction speed and cost are not compromised.

KEYLINK

Enables communication between the EFTPOS terminal and many Point of Sale systems. This interfacing solution reduces the chance of human error when conducting transactions.

PHONE TOP UP

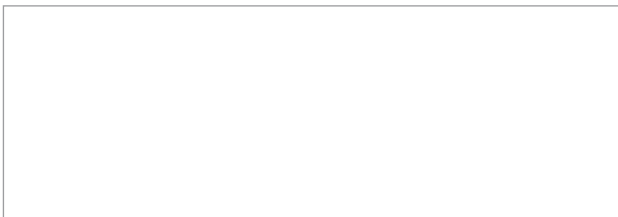

Allows your business to earn extra revenue by selling prepaid mobile phone top ups & calling cards.

BROADBAND CAPABLE

Allows you to connect via broadband (static or dynamic) with back up Dial-up via a phone line.

* Features & benefits may depend on which bank you acquire with

YOUR LOCAL SMARTPAY CADMUS REPRESENTATIVE

SMARTPAY CADMUS MEANS EFTPOS

Smartpay Cadmus designs, develops and implements innovative point of sale payment solutions, including 'custom branded' products, for businesses in New Zealand and Australia.
