

PAYMENT SOLUTIONS MADE EASY

STANDALONE - ONE PIECE COUNTER TOP

If your business has limited counter space then the PAX one piece counter top Terminal could be the right solution for you.

With a small footprint, the terminal takes up minimal space ensuring your counter top remains clean and uncluttered. The one piece technology has an embedded secure PIN Pad which increases product durability, reliability and reduces cabling.

The 'all-in-one' ergonomic design is easy, natural and intuitive to use for everyday EFTPOS processing requirements and more.

The PAX terminal is also expandable with an extended PIN Pad for added convenience.

MARKETS

The PAX counter top is suitable for general retail, boutique stores and dairies. The Terminal has a back-lit display and keypad which makes it easy to read and operate even in low light environments.

MORE THAN JUST EFTPOS FEATURES AND BENEFITS*

SECURITY COMPLIANT

All Cadmus terminals are developed to the latest international banking security standards, which enhance payment security and are Chip Card compliant.

ERGONOMIC DESIGN

The large screen and keys have been ergonomically designed for easy PIN entry. Back lighting ensures the screen and keys are easy to read, especially in darker environments where EFTPOS is used.

PRE-AUTHORISATION

Important for businesses that operate a deposit or bond system as a part of their service offering. Pre-authorisation capability allows you to check validity, funds availability and enables you to place a hold on funds.

TIPPING

Important for businesses where customers want to acknowledge good service. The Tipping feature is easy to activate and operate.

MULTI-MERCHANT CAPABLE

This enables multiple business entities to share a single EFTPOS terminal.

MANUAL PAN

Ideal for telephone or mail order businesses.

DECLINE ALERT

Stops declined transactions and requires merchant intervention.

MULTI-DROPPING

Multiple terminals can be installed in an environment where only a single phone line is available. This solution ensures that transaction speed and cost are not compromised.

KEYLINK

Enables communication between the EFTPOS terminal and many Point of Sale systems. This interfacing solution reduces the chance of human error when conducting transactions.

PHONE TOP UP

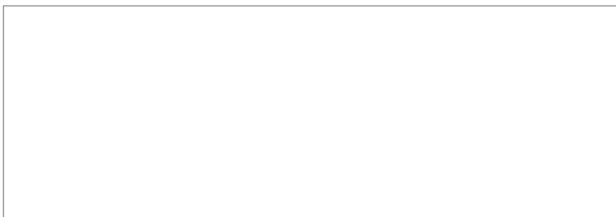

Allows your business to earn extra revenue by selling prepaid mobile phone top ups & calling cards.

BROADBAND CAPABLE

Allows you to connect via broadband (static or dynamic) with back up Dial-up via a phone line.
