

PAYMENT SOLUTIONS MADE EASY

STANDALONE EFTPOS - COUNTER TOP

If your business has no free counter space or room for oversized Eftpos Terminals then the ProvencoCadmus two-piece counter top may well be exactly what you have been looking for. This two-piece product boasts an ergonomic hand-held PinPad and extremely small footprint printer which means your Eftpos equipment doesn't need to battle for counter space.

This product is power packed with advanced features and very easy to use for everyday Eftpos processing requirements and more.

MARKETS

The ProvencoCadmus counter top is suitable for general retail, boutique stores, dairies, restaurants and bars. The PinPad has a back-lit display and keyboard which makes it easy to read and operate even in very low light environments such as bars and night clubs.

THE BENEFITS OF EFTPOS TO YOUR BUSINESS

- Accepting Debit or Credit cards increases your Customers payment options by offering an alternative to Cash or Cheque
- Allows your business to receive full payment at the time of service and improve cash flow
- Eliminates waiting for payment and ensures that payment is controlled by the person doing the work
- Reduces the security risk of Cash handling and wasting time visiting banks to make deposits
- Removes the need to use non-guaranteed Credit Card zip-zap manual voucher machines

MORE THAN JUST EFTPOS FEATURES AND BENEFITS*

EMV/3DES COMPLIANT - all ProvencoCadmus terminals are developed to the latest EMV/3DES network security standards, which enhance payment security and are Chip Card compliant.

ERGONOMIC DESIGN - the large screen and keys have been ergonomically designed for easy PIN entry. Back lighting ensures the screen and keys are easy to read especially in darker environments where Eftpos is used.

THERMAL PRINTER - all ProvencoCadmus terminals incorporate high speed quiet thermal printing. They are capable of printing different sized text, images such as company logos and barcodes.

STANDARD FEATURES - purchase, cash out, purchase with cash out, refund, credit or debit cards.

PRE-AUTHORISATION - important for businesses that operate a deposit or bond system as a part of their service offering. Pre-authorisation capability allows you to check validity, funds availability and enables you to place a hold on funds.

TIPPING - important for businesses where customers want to acknowledge good service. The Tipping feature is easy to activate and operate.

MULTI-MERCHANT CAPABLE - this enables multiple business entities to share a single Eftpos terminal.

* Features & benefits may depend on which bank you process with

CHEQUE AUTHORISATION - protects your business from cheques that bounce.

MANUAL PAN - ideal for phone or mail ordering businesses.

DECLINE ALERT - stops declined transactions and requires merchant intervention.

MULTI-DROPPING - multiple terminals can be installed in an environment where only a single phone line is available. This solution ensures that speed and cost are not compromised.

KEYLINK - this feature enables communication between the Eftpos terminal and many Point of Sale systems. This interfacing solution reduces the chance of human error when conducting transactions.

EXPANDABILITY WITH SECONDARY APPLICATIONS - ProvencoCadmus terminals are built with increased memory to allow performance beyond Eftpos services. Secondary applications includes loyalty cards, gift cards, data capture and many more customised applications.

YOUR LOCAL PROVENCOCADMUS REPRESENTATIVE

PROVENCOCADMUS MEANS EFTPOS

ProvencoCadmus designs, develops and implements innovative point of sale payment solutions, including 'custom branded' products, for businesses in New Zealand, Australia and Asia Pacific.

Full payment and data management solutions are designed for retailers, banks and other organisations. We offer Eftpos and data capture terminals, loyalty, gift card and customer relationship management programs.
